

**Our Vision:**

That children all over the globe are strategically positioned on the front line of the global climate change and are armored with resources, skills, and a safe space to meaningfully participate in climate change adaptation action

**Our Mission:** To foster child-centered and child-led climate action:

## Putting children at the forefront on the fight against climate change

We believe that every child deserves a healthy and safe environment. We want to ensure that all children can enjoy these rights and are partnering with children to deliver immediate results. We offer climate smart solutions that educate children while they are still young about the importance of taking care of mother nature and their surroundings.

We want to have a positive impact on the planet!

**“There is no greater, growing threat facing the world’s children and their children than climate change”.**

The Climate Smart Initiative for Children is a Non-Governmental Organization working with children across the globe to bring an end to climate change. At 30% of the current world’s population, children do not only represent the largest group of people currently affected by climate change, but they are also more vulnerable than adults to its harmful effects and are the generation that will be required to deal with the future impacts of climate change.

## Our Activities

- School debates and awareness campaigns on the importance of mitigating climate change
- Tree planting
- WASH activities
- Climate Smart Agriculture for children
- Poems, Art and Essay Competitions
- International Academic Tours

## Take action

- Encourage children to come up with solutions and creative ways to express their ideas.
- Use a science class presentation or other project to educate children about the need for climate change solutions.
- Form a club at school with other interested classmates and brainstorm how to help your local community.
